

Connectivity

The advanced technology of Sequoia delivers the very best customs clearance software available and the perfect integration solution for your business.

International Customs and Trade

Sequoia provides gateways to all of the UK Community Service Providers and to CHIEF, the customs declaration processing system.

With the increasing requirement to communicate with other EU member states and beyond as well as business partners and other regulatory bodies, the modular construction of the Sequoia platform is specifically designed to support the future expansion of connectivity to other customs authorities.

Systems and Data Integration

The capture and re-use of data from a single input is essential for modern, cost efficient enterprise systems.

Data is entered only once into Sequoia and is then automatically shared across functions and systems, eliminating dual keying and increasing accuracy and productivity.

Sequoia provides limitless integration and data exchange opportunities, both internally and externally, through a comprehensive, flexible web services API.

Features at a glance

- Role based access and security
- Intelligent, real-time compliance monitoring
- Enhanced productivity
 - Elimination of dual keying
 - Reduced errors
- Advanced reporting
 - Instant report building
 - Output to html, pdf, rtf, txt, xls
 - SQL reporting services
- Customisable data views
- Advanced customer database management
- Enhanced data entry features
- Comprehensive search functionality
- Modern technology
 - Microsoft SQL Server
 - Microsoft .NET framework
 - Microsoft Windows with WCF, WWF technology
- Modular plug-in architecture
- Open, extensible platform
- High performance service architecture
 - Secure service communications
 - Support for virtualised environments
 - Support for terminal services
- Extensive interfaces
 - Industry standard connection protocols
 - Easily consumable message schemas
 - Seamless integration with external systems
- Fully customisable print control
- Unrivalled 24x7x365 support
- Comprehensive training
