

## Compliance

The smallest error you make completing a customs declaration can lead to additional costs, unacceptable delays and dissatisfied customers.

The increasingly complex legal and regulatory requirements of international trade make keeping track and being in control ever more important and more difficult.

Sequoia provides all the intelligent tools you need to monitor and control your compliance and accuracy at both individual and team level.

Users only have access to those areas and functions that they need to perform their duties.

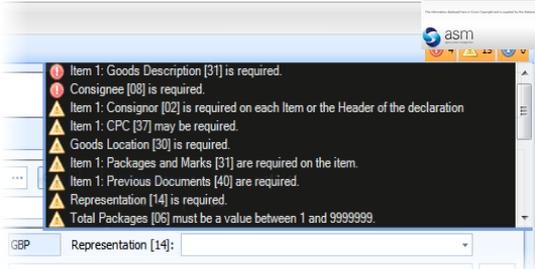

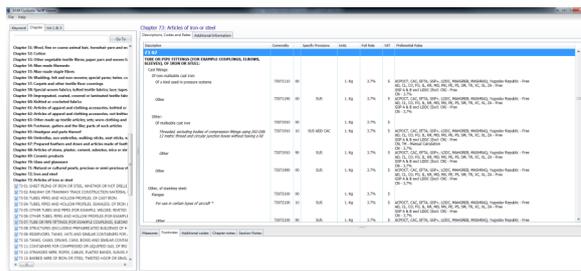

### Compliance Monitoring

Real-time, fully customisable compliance monitoring tools prevent the input of incorrect data to customs declarations

### Customs Tariff

Access to accurate information is critical to complying with complex customs requirements. Knowing the rules helps you to follow them and avoid delays.

Sequoia is the first and only Customs software solution to provide a fully indexed electronic Customs Tariff - including **all 3 volumes** - and deliver it all to your desktop.

It combines all the visual benefits of the traditional paper tariff with the clear advantages of searchable electronic media and instant access.

The information is always up to date and the most accurate source of tariff information available anywhere.

So you can spend less of your time worrying about ticking boxes and more time actually moving them.

### Features at a glance

- Role based access and security
- Intelligent, real-time compliance monitoring
